PROFESSIONAL SUMMARY

Machine Learning Engineer with over 15 years of experience in designing and implementing AI-driven cloud solutions. Expertise in architecting scalable ML pipelines using Databricks and Snowflake, with a focus on healthcare data analytics and MLOps practices. Proven ability to integrate advanced analytics and machine learning models into production environments, leveraging Python and Azure technologies to drive business intelligence and automation. Skilled in optimizing data pipelines and ensuring compliance with industry standards.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **ML Frameworks:** TensorFlow, PyTorch, MLflow
- **Cloud Platforms:** Azure, AWS
- **Data Tools:** Databricks, Snowflake, Azure Data Factory, SnowSQL
- **DevOps:** Azure DevOps, CI/CD, Terraform
- **BI Tools:** Power BI, Streamlit

PROFESSIONAL EXPERIENCE

Senior Machine Learning Engineer

Jan 2024 – Present

Concora Credit

Beaverton, OR

- Architected and built scalable ML pipelines using Databricks and Snowflake, enhancing real-time analytics capabilities for financial data processing.
- Implemented MLOps practices with MLflow and Azure DevOps, streamlining model deployment and monitoring.
- Developed and deployed NLP models for anomaly detection in financial transactions, reducing risk exposure.
- Optimized data pipelines using Azure Data Factory and PySpark, improving data processing efficiency by 30%.
- Led the integration of LLM-based solutions for enterprise data intelligence, utilizing RAG techniques.
- Ensured compliance with PCI-DSS and GDPR through robust data governance frameworks.
- Collaborated with cross-functional teams to enhance AI-driven decision-making processes.
- Technologies: Databricks, Snowflake, Python, Azure DevOps, MLflow

Azure Data Architect

Dec 2019 – Dec 2023

Conduent

Austin, TX

- Designed and implemented cloud-based healthcare data solutions on Azure, ensuring scalability and compliance with HIPAA standards.
- Developed ETL/ELT pipelines using Azure Data Factory and Databricks, optimizing healthcare data processing.
- Architected data models and storage solutions to enhance healthcare analytics and reporting.
- Integrated Snowflake for advanced data warehousing and BI tool compatibility.
- Led cloud migration strategies, reducing operational costs and improving data accessibility.
- Implemented real-time data streaming solutions to enhance patient care coordination.
- Technologies: Azure, Snowflake, Azure Data Factory, Databricks, Terraform

Azure Data Architect

Mar 2018 – Dec 2019

Unify Solutions Inc, Client: Toyota

Plano, TX

- Optimized data processing and analytics workflows using Azure and Snowflake.
- Reduced data processing time by 30% through efficient data pipeline management.
- Implemented machine learning models to improve customer retention and cross-selling opportunities.
- Developed real-time analytics tools providing insights for business intelligence.
- Technologies: Azure, Snowflake, Databricks, Python

Azure Solution Architect

Dec 2016 – Mar 2018

Protivix

Dallas, TX

- Designed scalable cloud infrastructure on Azure, ensuring high performance and security.
- Implemented ETL processes and optimized data integration strategies.
- Developed REST APIs and managed Azure resources for secure data solutions.
- Automated deployment processes, enhancing operational efficiency.

- Technologies: Azure, PowerShell, ARM Templates

Healthcare ML Pipeline Development

Nov 2015 – Dec 2016

Baltimore County Gov

Towson, MD

- Developed ML pipelines for healthcare data processing and analytics using Databricks and Snowflake.
- Integrated NLP models for patient data analysis, improving healthcare outcomes.
- Implemented CI/CD for model deployment and monitoring, ensuring seamless updates.
- Collaborated with healthcare teams to optimize data workflows and compliance.
- Technologies: Databricks, Snowflake, Python, Azure DevOps, MLflow

ML Model Deployment for Financial Analytics

Mar 2009 – Nov 2015

Quintiles

Raleigh, NC

- Deployed ML models for financial risk assessment and fraud detection using Python and Databricks.
- Implemented real-time analytics with Azure Stream Analytics, enhancing decision-making.
- Optimized model performance and scalability, ensuring compliance with financial regulations.
- Technologies: Python, Databricks, Azure Stream Analytics, Azure DevOps, MLflow

EDUCATION

Andhra University

Jul 2000

Master of Computer Applications

Andhra Pradesh, India

Nagarjuna University

Jun 1996

Bachelor of Sciences

Andhra Pradesh, India

CERTIFICATIONS & ACHIEVEMENTS

- AZ-104: Microsoft Azure Administrator
- AZ-303: Microsoft Azure Architect Technologies
- Databricks Certified Data Engineer Professional
- AZ-304: Microsoft Azure Architect Design
- PMP Certified Professional
- 70-339: Managing Microsoft SharePoint Server 2016
- 70-343: Managing Projects with Microsoft Project 2013/2016
- MCAD: Microsoft Certified Application Developer
